SKILLS

Expertise: Tailwind CSS, JavaScript, React.js, Firebase Authentication
Comfortable: MongoDB, Node.js, Express.js, Next.js
Tools: VS Code, Dev Tools, GIthub, Canva, Vercel

CAREER OBJECTIVE

Front-end developer with proven skills in crafting seamless user experiences. Working for 1 year in the web sector(with HTML, CSS, and Bootstrap). I have recently mastered the MERN stack. Driven to build responsive and functional web interfaces. Aiming to contribute to innovative projects at a company making waves.

WORK EXPERIENCE

Applied expertise in HTML, CSS, and Bootstrap to deliver front-end solutions during a one-year freelance tenure. Developed and implemented responsive and visually appealing web interfaces for diverse clients internationally. Collaborated closely with clients to understand and fulfill their unique design requirements.

MY WORKS IN CODE

Quill Academy
Online learning marketplace

Duration: 6 days
Client Code   Server Code   Live Preview

All-in-one online learning marketplace for seamless learning and teaching others.
Key features:
- Diverse user interface based on user role
- Authentication, Authorization & private pages
- Seamless payment with stripe
- Request to be an instructor, add courses, add assignments for teacher. Approve teachers, and courses, make admin, delete user, reject teacher, reject course, and many more options for admin. Students can enroll in courses, pay, submit assignments, and beyond.

Technologies I have used: Tailwind CSS(Daisy UI), React, Firebase, Node.js, Express js, and MongoDB

ShareABite
Food-sharing community platform

Duration: 4 days
Client Code   Server Code   Live Preview

Go-to platform for connecting surplus food to those in need.
Reduce food waste and feed the hungry.
Key features:
- Search and sort functionality
- Authentication and private pages
- Social share functionality
- Accessible from all devices and browsers

Technologies I have used: Tailwind CSS(Flowbite), React, Firebase, Node.js, Express js, and MongoDB
